

COMPONENTS FOR CONNECTING

Headlamp

Front-head holding

High life LEDs

3 levels of intensity

The LED headlamp is ideal to use on-site where ambient light is poor or absent. It is lightweight and comfortable to wear thanks to its elastic band. LEDs emit white light with three selectable levels of intensity, offering longer life than traditional incandescent bulbs while consuming less power, increasing its battery life. It works with 3 AAA batteries.

*The headlamp is available as a separate accessory, being part of the **PL-10 Connecting Kit** or part of the **OP-040 Fusion Extension Kit**, which in a suitcase includes all the most important tools and accessories to make inexpensive fiber connections.*
